Module 1: Introduction to Data Analysis

Mission 1.1 - What is a Data Analyst?

Task

After Nabeel's introduction to the Data Analyst Role, we're sure you have a fairly good idea of what it takes to be a Data Analyst and how data is used. Now, it's time for a short reflection exercise that will help you create a strategy to break into this industry.

In the submission box below answer these questions:

- What current skills of mine are relevant in this space?
- What skills do I need to develop?
- How will I develop these skills?
- What relationships do I need to build to break into this space, and how can I start building my network?

Submission

Mission 1.1 - What is a Data Analyst?

*Required

What is your email address? (Make sure this is correct so that we can track your submission) *

Your answer

What current skills of mine are relevant in this space? *

Your answer

What skills do I need to develop? *

Your answer

How will I develop these skills? *
